*The Wooden Quill*

## About the Artist

*Mike Marek has been an avid wood worker for over 30 years. He is proud to present a limited edition of nautical themed quality writing instruments. Each pen is individually crafted, engraved and numbered. All metal parts are platinum plated to withstand the rigors of everyday use. We also offer gift boxes that can be engraved for presentation and that special remembrance.*

*For additional information or to order your special pen contact the artist at [info@thewoodenquill.com](mailto:info@thewoodenquill.com) or visit us at [www.thewoodenquill.com](http://www.thewoodenquill.com)*

Scrimshaw  
Writing  
Instruments**

## *"Thare She Blows"*

*A Limited Edition Pen in  
Burmese Teak and  
Alternative Ivory.*

*Quality writing instruments that touch  
history for those that require the best.*

*"Thare She Blows"*

*A Limited Edition Pen*

*Whaling scene on pen cap*

The Wooden Quill is pleased to announce a limited edition theme pen in Burmese Teak and alternative Ivory. Each pen is individually crafted using the finest materials. After turning the upper barrel the pen is laser engraved with a whaling image from the Boston Whaling Museum. The ivory band on the lower barrel at the nib end is engraved with Annapolis, Md. The artist's favorite seaport and the other ivory band contains the issue number for the series. Your pen is then polished, assembled and inspected for quality.

Your pen is accompanied by a certificate of authenticity and includes the issue number of the pen in the series and is delivered in a presentation box.

### History of Scrimshaw

Scrimshaw is an art form that is considered by some to be the only art form that originated in America, since the art of Scrimshaw was first practiced by sailors working on whaling ships out of New England.

The word Scrimshaw actually came from a slang expression that was used to refer to anything that was the product of a seaman's idle time, or items that were produced while engaged in the act of loafing. Today, a good example of Scrimshaw would be whittling on a stick and ending up with something that would be either decorative or even useful. While out at sea there were often

several weeks, or even months, that would pass between whale sightings. It was during that time that the sailors would practice their Scrimshaw.
